What Up?

Well what d'ya know, the new year is upon us! In retrospect, 1986 was a good year, nay a very good year for new music. Here's hoping '87 brings much of the same. A new year inevitably brings up New Year's Resolutions. Here's mine, radio-wise:

1. Playlists listing top 75 featured albums, top 15 featured 7" singles and top 10 featured carts mailed out on a weekly basis (just albums this time, though), at least to those folks with stuff being featured that week.
2. Prompt phone response. I hope to be getting to the point where someone's calling you first.
3. Yes, I will fill out your damn questionnaires (I imagine you think this is the stuff MDs live for).
4. Faithful reports to the trades, based on actual airplay and not some made-up walarkey pivoting around my biases and your bitchings.
5. 2000 new releases received or purchased for 1987 (1523 in 1986--Thank You!).

And may I take the liberty of suggesting a New Year's Resolution for you:

1. Patience with a hard-working yet over-extended, overambitious, tip-toeing on the thin ice of burn-out yet too in love with this stuff to give it up, close to being fired from his day job because he spends way-too-long lunch breaks at the station, sincere Music Director.

You should be chillin'
